DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-35, drawn to methods comprising applying an antibacterial fluid to a medical cannula or into a lumen of a catheter, kits containing instructions for practicing said methods, an antibacterial formulation, a container containing said formulation, a cannula filled with said formulation and a method comprising attaching said container to a catheter in the body of a patient, classified in class 424, subclass 404.
 - II. Claims 36-38, drawn to an aqueous solution of an antithrombotic agent, classified in class 514, subclass 56.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different effects, as the invention of Group I is directed to an antibacterial composition and methods comprising applying said antibacterial composition to implant devices to eliminate bacterial infections in a patient in need of treatment, whereas the invention of Group II is directed to antithrombogenic compositions for the treatment of thrombosis.

Art Unit: 1615

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Attorney Garretson Ellis on October 9, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
